MEMORANDUM FOR: Chief, Military-Economics Division, ORR

25X1A ATTENTION: [REDACTED]  
THROUGH: Chief, Requirements Branch, Reconnaissance Group, CGS  
FROM: Chief, CIA/PID (NPIC)  
SUBJECT: Mensural Data Batch Plant, Tyura Tam Missile Test Center, USSR  
REFERENCES: (a) Requirement C-RR-4-81,058  
(b) CIA/PID Project C 298-64

1. This memorandum is in response to your requirement dated 5 February 1964 requesting a metrical analysis of the bulk storage silos at the concrete batch plants in the support area between Launch Complexes A and E at Tyura Tam, USSR.

2. The diameters of the referenced bulk storage silos are given in NPIC/R-63/64 Figure 2. These measurements were provided by CIA/TID (NPIC). The height of the four (two pairs) northernmost bulk storage silos are estimated to be 30 to 40 feet tall, with a high degree of reliability. This dimension was derived from measuring the lengths of the shadows cast by single-story buildings in the area which are estimated to be 15 to 20 feet tall. This factor was then applied to the shadow lengths of the storage silos. The diameters of these four silos are [REDACTED] 25X1D  
25X1D [REDACTED] from north to south respectively. No attempt was made to determine the height of the other silos since they were still under construction.

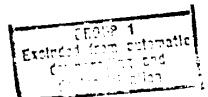

25X1D [REDACTED]

25X1A 4. The photo analyst on this project is [REDACTED] and he may be contacted on extension 2078 for any additional information.

5. This project is considered to be complete.
